PRESS RELEASE:

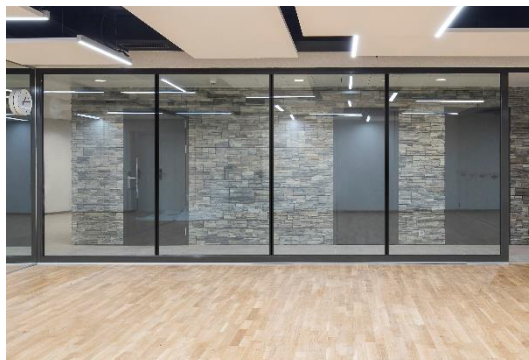

Two new products for the CONTRAFLAM STRUCTURE family

More design diversity for high quality fire-resistant glasses

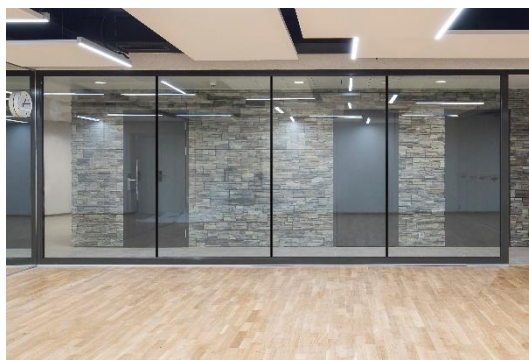

Contraflam_Structure_Family

CONTRAFLAM STRUCTURE product range with its two new glass systems: CONTRAFLAM STRUCTURE Elegance and CONTRAFLAM STRUCTURE Vibrance.

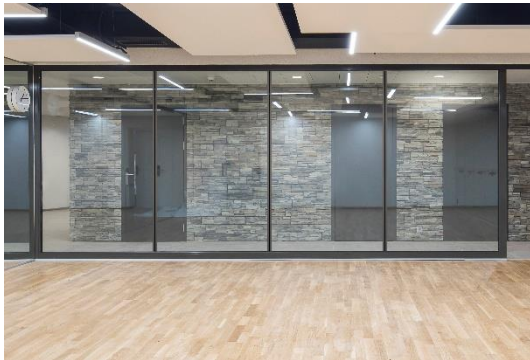

Contraflam_Structure

CONTRAFLAM STRUCTURE, the patented flush glazing with vertically arranged edge-to-edge silicone seals.

Contraflam_Structure_Elegance

CONTRAFLAM STRUCTURE Elegance has the thinnest sightline of any "toughened" edge-to-edge fire-resistant glass.

Contraflam_Structure_Vibrance1

With CONTRAFLAM STRUCTURE

Vibrance, the fire resistant glass can be coordinated with the colours of the environment. For example, by choosing neutral or reserved colours, the glass visually blends in with the decor.

Contraflam_Structure_Vibrance2

The vertical edges of CONTRAFLAM STRUCTURE Vibrance, which are lacquered on the back, can provide invigorating accents with contrasting colours.
