

# DOOR STOP

## SPECIFICATIONS

### Function

Block the door

**Dimensions in mm**  
(Length × Width × Height)

35 × 35 × 17

### Material (cover)

Polymer

### Color

Black

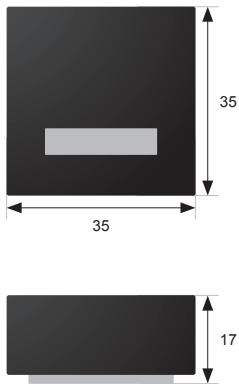

## DESCRIPTION

The door stop is a shake proof part which could safeguard the wall surface and avoid damages caused by crash. It can be also deployed to restrict the door swing angle partially, making the door leaf single acting instead of double acting.

## FEATURES

- + Easy to install
- + Durable in use

## DIMENSIONS

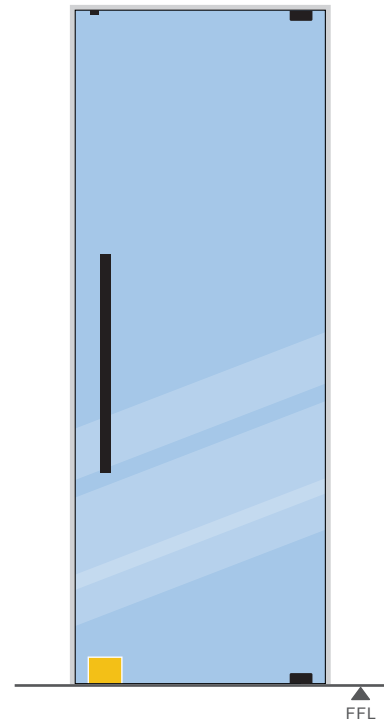

## LOCATION

### (A) To make the door single acting

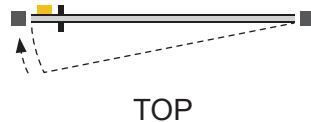

SIDE

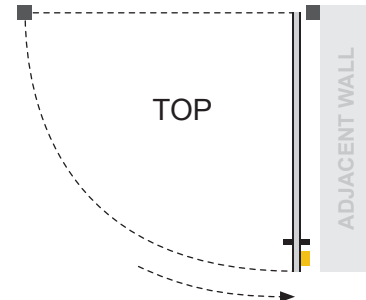

### (B) To safeguard the wall surface
